

# Ford Museum & Greenfield Village

## PROJECT DESCRIPTION

The Mannik & Smith Group, Inc. (MSG) was contracted to prepare site utility and topographic drawings for Henry Ford Museum & Greenfield Village (HFM & GV). The drawings were used for utility upgrade planning. An aerial survey was performed for the 250± acre site.

MSG completed ground surveying to obtain additional detail dimensions and information. All underground utilities were researched and surveyed for inclusion on the drawings. The boundary of the property was also surveyed by a Michigan Registered Professional Surveyor. Forty-two 36"x48" drawings were provided to HFM & GV.

## LOCATION

Dearborn, Michigan
